Subject: Agencies' Direction on Fresh Water Implementation Activities

Dear Ms. Meeks,

Based on geophysical and chemical information gathered from the exploratory boreholes at the two proposed Arizona locations and the teleconference discussion held on November 4, 2013, DTSC and DOI hereby jointly instruct PG&E to proceed with the installation of freshwater supply well at Site B and the aquifer testing of both Site B (step-rate and constant-rate extraction tests) and the existing HNWR-1 well (constant-rate extraction test) pursuant to Section 3.2 of the approved August 2013 Freshwater Implementation Plan. The agencies note that PG&E will also be collecting samples for specific suite of analytes at the time intervals specified in the approved work plan during the long term constant rate extraction tests to evaluate if water quality is changing over time.

Once the well installation and aquifer testing activities are complete, the agencies expect PG&E to provide another report and hold additional discussions with agencies, stakeholders and Tribal Nations. Based on information to be submitted, DTSC and DOI will deliberate and provide additional direction to PG&E on the final supply well location.

If you have any questions regarding this directive, please feel free to contact me or Pam Innis of DOI.

Sincerely,

Aaron Yue
