Date: July 28, 2015	Lead Agency: Department of Toxic Substances Control Office of Geology
Site Name/Address: PG&E Topock, Needles, CA	Project Manager Name: Aaron Yue
Resolution Number: 03/03	Project Manager Phone Number: (714) 484-5439

1. Date(s) of Consultative Meeting(s) and List of Attendees (Agency):

In FY 14/15, The Department of Toxic Substances Control (DTSC) and the Consultative Work Group (CWG) conducted face-to-face meetings periodically and teleconference calls as frequently as the project warranted. During FY 14/15, face-to-face meetings were held on July 16, 2014, October 29, 2014, February 18, 2015, and April 22, 2015. The Geo/Hydro Technical Subcommittee (TWG) of the CWG also meets periodically. During FY 14/15, face-to-face TWG meetings were held on July 17, 2014, September 17, 2014, October 29-30, 2014, February 19, 2015, March 18, 2015, and April 22, 2015. The Clearinghouse Task Force (CTF) met on July 15, 2014, August 19, 2014, September 16, 2014, October 28, 2014, December 9, 2014, January 20, 2015, February 17, 2015, March 17, 2015, and April 21, 2015.

A list of attendees of face-to-face meetings held during FY 14/15 is provided as Attachment A. A list of all CWG Members and Tribal Representatives notified and invited to attend the CWG meetings is provided as Attachment B. A list of everyone notified and invited to attend Sub-Committee meetings is provided as Attachment C.

Participants at the CWG meetings included members of local, state, and federal government stakeholder agencies, as well as representatives of the Chemehuevi Indian Tribe (CIT), Cocopah Indian Tribe, Colorado River Indian Tribe (CRIT), Fort Mojave Indian Tribe (FMIT), and Hualapai Indian Tribe. Each meeting agenda and significant issues from previous consultative meetings were provided to all participants.

2. Recent Public Comment/Participation:

Information Repositories (IRs) and Topock Website

During each quarter of FY 14/15, DTSC updated the DTSC Topock Project website with documents from the previous quarter.

DTSC maintains seven project repositories located in Needles, Havasu Lake, Cypress, California and Golden Shores, Lake Havasu, Parker, Arizona. Information repository compact discs (cd's) were prepared and delivered during the 2nd Quarter of FY 14/15 containing the State's 4th Quarter FY 13/14 and 1st Quarter FY 14/15 information. During the 3rd and 4th Quarters of FY 14/15, DTSC prepared Information Repository cd's for the State's 2nd and 3rd Quarters FY 14/15.

Community Outreach

A 2014 fact sheet was prepared for publication in July 2014. Hard copies were mailed out to residents and local communities on June 26, 2014. Additional 2014 fact sheets were distributed to the community, stakeholders, and tribes to assist with the public meetings and Soil EIR public comment period.

DTSC managed reservation and use of a Topock physical model showing features of the Groundwater Remedy 60% Design at stakeholder meetings throughout FY 14/15.

DTSC prepared for and orchestrated the second annual Topock Orientation for Tribes and Stakeholders on March 9-10, 2015.

DTSC announced and completed two separate public comment periods for the recirculated Soil Investigation EIR and the Groundwater Remedy Subsequent EIR (SEIR). DTSC prepared for and hosted three public Scoping Meetings for the preparation of the SEIR. A Tribal focused scoping meeting was held in FMIT on May 19, 2015, and two general public meetings were held on May 19-20, 2015 in Needles, California, and Golden Shores, respectively.

Tribal Outreach

DTSC met with the Hualapai Tribal Council on 10/15/14 regarding the soil investigation project and draft EIR. An update on the groundwater remediation project status was also provided.

On 4/20/15, DTSC held three meetings with tribes regarding the EIR on the Groundwater 90% Design and the Scoping comment period. The first was attended by the FMIT, the second by Chemehuevi, and the third by FMIT, Chemehuevi and CRITs.

On 5/19/15, DTSC held a Subsequent EIR Tribal Focused Scoping Meeting at FMIT's Band Room. The meeting was attended by the FMIT, Hualapai, Cocopah and Chemehuevi Indian Tribes, as well as members of the Technical Review Committee (TRC).

Topock Site Mailing List Update

The Topock mailing list was updated during the 1st Quarter of FY 14/15. DTSC used returns from the July public comment period postcard, fact sheet, and public comment period extension postcard mailing to update the mailing list. Extensive review of the returns was performed with detailed input from the mailing contractor. A comprehensive revision of the mailing list was performed in January 2015. A major update of the mailing list was also completed in April 2015 in preparation for the Groundwater Remedy subsequent EIR scoping meeting announcement.

3. Describe the Potential or Known Areas of Concern:

DTSC continues to oversee PG&E in evaluating what is needed to protect the beneficial uses of groundwater and the Colorado River. From 1951 to 1964, untreated wastewater containing hexavalent chromium was discharged into an area known as the Bat Cave Wash (a dry streambed near the Colorado River). This resulted in a plume of hexavalent chromium contamination in the groundwater beneath the facility which now extends under federal property, managed and overseen by the U.S. Department of Interior.

In addition, there are localized areas within and around the Topock Compressor Station (TCS) where chromium, hexavalent chromium, and other compounds (such as other metals, semi-volatile organic compounds, asbestos), have been found in soils. These occurrences are related to disposal and handling practices when chromium was used at the site. DTSC anticipates that these localized areas of soil contamination will be addressed by PG&E in the soil Corrective Measures Study (CMS) and final remedy.

4. Current Phase of Action:

Groundwater Remedy

- The Basis of Design Report/Pre-Final (90%) Design was submitted on September 8, 2014, along with the Construction Remedial Action Work Plan. The cost estimate portion of the 90% Design was submitted on September 15, 2014.
- On October 21, 2014, DTSC and DOI directed PG&E to prepare a supplemental Basis of Design Report/Pre-Final (90%) Design to provide additional details on certain elements in the 90% Design. DTSC and DOI provided further direction to PG&E on December 23, 2014 and directed PG&E to submit the Supplemental 90% Design report by February 2, 2015.
- The Supplemental 90% Design report was submitted to agencies and stakeholders on February 2, 2015. On March 16, 2015, DTSC granted an extension for comments on both the 90% Design and the Supplement to the 90% Design to March 20, 2015. DTSC participated in the 90% Comment Resolution Meeting with DOI and PG&E via teleconference on May 26-27, 2015 and on June 17-18, 2015 in Cypress, California. Comment resolution is ongoing with Tribes and Stakeholders.
- DTSC, DOI, and PG&E discussed and resolved select responses to comments on the Risk Assessment Work Plan Addendum 2. A Response to Comments Table was sent by PG&E to Tribes and Stakeholders for review on March 10, 2015. DTSC, DOI, and PG&E discussed and resolved select responses to comments on the Risk Assessment Work Plan Addendum 2. A meeting to discuss the responses was held on April 23, 2015. The Final Risk Assessment Work Plan Addendum 2 is planned to be submitted in early July.
- On May 5, 2015, DTSC announced, via a Notice of Preparation, a Draft Groundwater Subsequent EIR will be prepared to evaluate the potential environmental impacts in the Groundwater Remedy Design documents. DTSC is evaluating scoping comments from the public comment period on the proposed Draft Subsequent EIR for the Groundwater Remedy.

Soil Investigation EIR

- DTSC prepared a Soil EIR and provided it for public comments in July 2014. An extension request was granted on August 4, 2014 that extended the comment period to September 5, 2014. Over 650 comments were received on the draft EIR. Responses to comments are ongoing.

- biennially in 146 wells

The frequencies noted above apply to the Topock groundwater and surface water monitoring program, and do not include other monitoring programs such as the Compliance Monitoring Program (CMP).

Oversight Agency Costs Reimbursed to Date: DTSC labor expenditures for July 2014 to June 2015: DTSC spent 6,295 hours with an oversight cost of approximately \$1,258,902.00

12. Additional Comments or Issues – add additional pages as needed

(Continued from Section 4)

Freshwater Implementation Plan

The Freshwater Evaluation Technical Memorandum was submitted by PG&E on April 2, 2014. Direction from DOI and DTSC on the freshwater source for the groundwater remedy was sent to PG&E in a letter on April 4, 2014. Related field work was completed in July 2014 and an *Addendum to the Summary of Findings Associated with the Evaluation of Alternative Freshwater Sources in the Topock Remediation Project Area* was included as Appendix N of the 90% Design and incorporates the direction from the agencies in the April 4, 2014 letter. A biological completion report was submitted September 11, 2014.

Wells

On July 11, 2014, PG&E submitted a Draft Decommissioning Plan for Topock Compressor Station Well Number 4 (TCS-4). DTSC, DOI and Tribes provided comments on the proposed plan. PG&E prepared and submitted responses to comments (RTCs) on December 22, 2014. After additional input from DTSC, PG&E revised the RTCs on February 9, 2015, and further refined the RTCs on June 24, 2015.

Surveys

- Protocol surveys for the Southwest Willow Flycatcher occurred on June 29 – July 3 and July 14-18, 2014.
- Western Yellow Billed Cuckoo surveys occurred on June 29 – July 3; July 14-18; August 5-8; and June 23-25, 2015.
- A biological completion report of the utility potholing was submitted on August 8, 2014.
- Revegetation area biology survey was completed in November 2014.
- Moabi Regional Park expansion area biology survey was completed in November 2014.
- Moabi Regional Park expansion area archaeological/historical sites survey was completed in December 2014.
- Bat habitat assessment survey was conducted within the Soil EIR and Final Groundwater Remedy project area on January 29-30, 2015 and April 27 – May 2, 2015. The draft report was prepared and submitted to DTSC on June 26, 2015. The final report was submitted to DTSC on July 7, 2015.
- A Desert Tortoise Habitat Assessment (non-protocol survey) was conducted around the Topock Compressor Station evaporation ponds and the access roadway on January 29, 2015.
- A Survey of mature plants and culturally sensitive plants in a small area between National Trails Highway (NTH) and the proposed soil storage area in Moabi Regional Park (located south of NTH) was conducted on January 30, 2015.
- On March 3, 2015, DTSC provided concurrence on the field procedures and protocol submitted by PG&E to address some issues observed during the field visit of September 9 to September 13, 2014 preconstruction field verification of archaeological and historical sites.
- Biological and archeological/historical resources surveys at areas proposed for groundwater remedy use within the Park Moabi Regional Park were completed on June 24-26, 2015. Biological studies included mapping of significant or ethnobotanical plants, delineation of wetlands or waters of the US as needed, opportunistic observations for rare plants, as well as desert tortoise surveys, general biology (wildlife) surveys (including nesting birds); plus mapping of upland Desert Tortoise habitat and disturbed areas.

Monitoring Programs

- Annual monitoring of archaeological/historic sites was completed in December 2014
- PG&E is implementing the EIR Mitigation Monitoring and Reporting Program requirements appropriate to the design and planning stages of the Final Groundwater Remedy, and has been submitting quarterly compliance reports. Quarterly EIR Mitigation Measures Compliance Reports for the Final Groundwater Remedy were submitted on July 31, 2014, October 31, 2014, January 30, 2015, and April 30, 2015.
- Implementation of the groundwater and surface water monitoring program continued during FY 14/15. Groundwater monitoring events occurred on September 22-25, 2014; October 1-2, 2014; November 3-20, 2014; December 1-23, 2014; February 9-19, 2015, and April 20 – May 27, 2015. The low river surface water monitoring event occurred on January 13-14, 2015. Surface water monitoring events occurred on July 15-16, 2014; November 11-12, 2014; February 23-24, 2015; and June 10-11, 2015.
- PG&E submitted the last annual 2014 floodplain *in situ* pilot test monitoring report and the last annual 2014 upland *in situ* pilot test monitoring on November 19, 2014. No additional monitoring of the uplands or floodplain In-Situ Pilot Test (ISPT) areas will be conducted going forward.
- Continuous operation of the Interim Measure groundwater extraction, treatment, and injection facility continued throughout FY 14/15. Periodic downtimes associated with optimization, maintenance, and repair occurred in conformance with permit conditions.
- PG&E completed required monitoring and reporting of treatment plant operations as required by the Applicable, Relevant and Appropriate (ARARs) under DOI oversight. IM-3 self-monitoring reports were submitted on July 15, 2014, October 15, 2014, January 15, 2015, and April 15, 2015.
- Performance Monitoring Program (PMP) activities in the Colorado River floodplain continued in FY 14/15. Quarterly PMP/GMP reports were submitted on August 15, 2014, December 15, 2014, March 13, 2015, and April 30, 2015. Annual report was submitted on March 13, 2015.

INSTRUCTIONS FOR COMPLETING A STATUS REPORT

GENERAL: This Status Report form is for use in communicating to Cal/EPA the activities of the Administering Agency and Support Agencies with respect to site investigation and remedial action. A Status Report should be completed following the initial Consultative Work Group meeting. Subsequently, an annual report should be completed each year for the period ending June 30th. A Status Report should also be completed at the end of a designated project. Type or print clearly all requested information in the spaces provided and attach additional pages as necessary to explain or complete your responses. Mail the Status Reports to:

California Environmental Protection Agency
1001 I Street, 25th Floor
Site Designation Committee
Sacramento, CA 95814

- 1. Date of Consultative Work Group Meeting and List of Attendees:** List date(s) of Consultative Work Group Meeting(s) that occurred during the year, including names of attendees followed by agency affiliation in parenthesis. If initial status report, attach summary of the first Consultative Work Group Meeting.
- 2. Recent Public Comment/Participation:** List documents received in the year subject to public comment or public meetings/hearings held and what you did to provide for public participation.
- 3. Describe Known or Potential Areas of Concern:** Describe the site investigative or remedial activities occurring at the site and issues for the year.
- 4. Current Phase of Action under the Site Designation Process**

List current phase of action corresponding to description provided below by assigning a number followed by an appropriate letter, if applicable (i.e. Work Plan Completed denote as level 3D).

<u>Number</u>	<u>Description</u>
1	Administering Agency Designated
2	First Consultative Meeting Completed
3	<u>Levels of Action</u> A - Preliminary Site Assessment Completed B - Site Investigation Completed C - Feasibility Study Completed D - Work Plan Completed E - Cleanup Alternative Selected and Authorized F - Design of Cleanup Alternative Selected G - Implementation of Cleanup Alternative (give % complete) H - Remediation Completed
4	Certificate of Completion Issued (after concurrence by other interested agencies).

5. **Proposed Site Use:** Check the appropriate box or boxes which describe the planned use for the site:
(1) Commercial/Industrial/Retail; (2) Residential (single/multi-family, sale/rental product); (3) Park or Open space;
(4) Schools, Hospitals, Day Care Centers or Other Non-residential Sensitive Uses.
6. **List any Technical Problems:** Describe any technical issues impeding site investigative or cleanup activities.
7. **Permits Required/Issued to Date and Pending Permit Issues:** List any permits currently being required and/or issued by the Administering or Support Agency. List any permits currently pending approval and any requirements yet to be fulfilled by the Responsible Party.
8. **Deed Restrictions/Land Use Controls:** Check applicable box and specify the date if the response is "yes."
9. **Cleanup Levels:** Specify current contamination levels and proposed target cleanup levels for major contaminants.
10. **Ongoing Monitoring:** Check the appropriate box(es) and/or specify any other type of ongoing monitoring that is in place. Specify approximate timeframes (using months/years) for monitoring, i.e., 11/06 – 1/10
11. **Oversight Agency Costs Reimbursed to Date:** For the project, list agency, amount reimbursed followed by pending reimbursement in parenthesis, and brief description of services provided by each agency.
12. **Additional Comments or Issues: If needed, attach additional sheets to** describe any important issues not previously addressed above such as issues discussed at last Consultative Work Group Meeting. In the event the project takes less than a year to complete, there need only be one report completed and submitted at the end of the project. Please attach a copy of any Certificate of Completion and/or closure letter issued when submitting the final report.
